OBJECTIVE

Computer Science Engineering student with knowledge of Java, HTML, CSS, and JavaScript, currently developing skills in the MERN stack. Experienced in working on web development and AI-based projects, seeking a web development internship to apply technical knowledge and gain practical industry experience.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering
Jerusalem College of Engineering
2024 – 2028 | CGPA: 9.40

SKILLS

Languages: Java, Python, JavaScript
Frontend: HTML, CSS, React
Backend: Node.js, Express.js
Database: MongoDB
Concepts: Data Structures, Basic Algorithms
Tools: Git

PROJECTS

Multi-Spectral Image Analysis for Water Body Monitoring
- Developed a system to analyze multi-spectral images for monitoring water bodies and detecting environmental changes
- Focused on identifying patterns and changes in environmental data

VoltClaim — The Missed Call That Gets You Paid
- Application for consumer compensation for electricity

Buildwise Aether
- AI-powered architectural planning platform with multi-agent workflows for floor plan generation, Vastu evaluation, cost estimation, paint recommendation, and automated project reporting using React, FastAPI, Google ADK, and Gemini

Organizational Knowledge Gap Intelligence Platform
- Full-stack web application for organizational skill gap analysis, training recommendations, and workforce analytics

Technovanza'26 (College Symposium)
- Worked as a Lead in the college symposium Technovanza'26

CERTIFICATIONS

Diploma in Computer Applications
MERN Stack Development Certification
Infosys Springboard Virtual Internship 7.0 (Java Technology Stack)

ACHIEVEMENTS

- Shortlisted in Prince iSolve Hack'26 (Top 100 out of 532 participants)
- Achieved 2nd rank in 1st semester and 1st rank in 2nd semester

EXTRACURRICULAR ACTIVITIES

- Web and Design Member, NCSE Association
